POLICE DEPARTMENT

Memorandum

To: Ann Wall, City Manager
From: Mark Holtzman, Chief of Police 
Date: April 25, 2018
Subject: Dash Cameras

At the March 8, 2018, City Council Meeting, City Council was made aware that the Greenville Police Department (GPD) has been selected as a recipient of the NC Governor's Crime Commission grant. Funding from this grant will allow GPD to purchase approximately 30 dash cameras for use in its patrol fleet. During the March 8 meeting, it was discussed that 25 additional cameras would be needed to completely outfit the current fleet. City Council asked that staff explore the feasibility of purchasing the additional 25 cameras, bringing the total in-car camera purchase to 55. GPD was directed to evaluate federal asset forfeiture reserves for this purchase.

Since the March meeting, GPD submitted an RFP for the purchase of the dash cameras. After reviewing the submitted bids, COBAN Technologies, Inc. (COBAN), has been selected as the vendor. Five vendors submitted proposals which were thoroughly reviewed by GPD and the Information Technology Department (IT). Approximately fifty requirements and specifications were reviewed for each vendor along with a detailed cost analysis. Based on their proposal, COBAN met the expectations of the department in full and was the most cost efficient choice. In the overall rankings of each vendor, Panasonic was the first choice of the review committee, preferred only slightly over COBAN in an objective assessment process. However, if selected there would be extensive additional costs associated with implementation of Panasonic as new servers, new equipment, new installation, new software and new training would be required.

COBAN is the current vendor for all in-car and body-worn cameras for the police department. The administrative back-office client for COBAN will seamlessly accommodate the addition of 30 new in-car cameras. As additional in-car and body-worn cameras are added, the only need for GPD and IT will be additional storage space which can easily be added to the existing servers and infrastructure.

The anticipated cost per COBAN camera is \$6,609.00. The total cost for 30 COBAN in-car cameras is \$198,270.00. In contrast, the cost per camera for the Panasonic in-car cameras would be \$7,960.93 for a total of \$238,827.90 for 30 units.

Dash Cameras Memo
April 25, 2018
Page 2

The additional 25 cameras discussed at the March 8 City Council Meeting will require an additional \$165,225 to purchase. After reviewing the Federal Asset Forfeiture fund, there is approximately \$135,000 currently available in this account; GPD will need to be cautious in the evaluation of expenditures in this account, weighing it against other departmental needs such as school safety and traffic/pedestrian safety needs.
